## EXPERIENCE

### FuelUp - Your On-Demand Fuel Delivery Solution Product Design & UI Development.

- Directed the end-to-end design of FuelUp, from user research and empathy mapping to wireframing and prototyping. Created intuitive user flows and interfaces that reduced booking completion time by 40%, resulting in a high user satisfaction rate.
- Developed expertise in wireframing, typography, color theory, interactive design, user research, usability testing, and user flow optimization while designing and refining low-fidelity and high-fidelity prototypes to enhance the overall user experience.

### CoLab - The Hub for Artist and Event Hosts. User Research, User Experience & UI Development.

- Designed MVP from Scratch for Gig Artists and Event Hosts: Led the end-to-end UX/UI design for CoLab, creating intuitive user flows and driving the app to secure pre-seed funding by meeting user needs for gig discovery, learning, and networking.
- Led Comprehensive User Research and Collaboration: Conducted user research, journey mapping, and market analysis, while collaborating with founders, product designers, and developers to ensure scalable and flexible future designs.

### ASSOCIATE ENGINEER

ATCS (A Nagarro Company) – Jaipur, India.

- Developed and Secured REST APIs for BMW's Web App: Utilized JWT authentication, conducted thorough testing with Postman, and led the integration of MFA using Entity Framework, improving system efficiency by 30% and enhancing security protocols.
- Managed Project Tracking Tools for High-Quality Delivery: Optimized sprint planning and project tracking using Jira and Confluence during an internship, contributing to the successful delivery of secure and efficient software solutions.
